

AAO Showcase

We scouted the exhibit hall floor at the AAO in New Orleans for all the cool products, equipment and services launched at the spring show. Check out these offerings' debut.

3M Unitek Incognito Appliance System Low Profile Bracket

The 3M Unitek Incognito Appliance System Low Profile Bracket now features an updated design that makes the profile of the system's fully customized brackets even lower. The posterior slot is integrated further into the bracket pad for greater patient comfort, without compromising ease of ligation. The bracket slot for the bicuspids and molars is moved an average of 60 percent closer (0.3mm) to the tooth surface, bringing more freedom to the tongue and improving biomechanics. For more information, visit www.3munitek.com.

3M Unitek Incognito Clear Precision Trays

Eliminating manual positioning errors, Incognito Clear Precision Trays from 3M Unitek use the latest digital technology to create the indirect bonding tray directly from the design data. Brackets are then inserted into the transparent Incognito Clear Precision Tray, allowing for easy visual control during the bonding process. Additionally, the tray can be cut and used as a jig for rebonding brackets. For more information, visit www.3munitek.com.

3M Unitek Forsus Class II Correctors for the Incognito Appliance System

The Incognito Appliance System and Forsus Class II Correctors are now coming together, available as a patented lower arch attachment with 100 percent customization. The Incognito System with Forsus Device

features a special archwire sequence and is available for EZ2 and L-pin Modules. Together they work more efficiently to simplify installation, reduce chairtime and provide effective Class II correction. For more information, visit www.3munitek.com.

flossFish

The flossFish uses regular dental floss and goes under the wire and between brackets so you can floss normally with braces on without the fuss of using threaders or other devices that can take twice as long or don't get your teeth nearly as clean. The flossFish patient bags sell in quantities of 10, 25, 50, 100, 200, 300, 500, or 1,000. The flossFish patient bags are perfect for dental professionals to hand out to their patients at the end of each office visit. Each bag contains 5 tools and 1 instruction card. For more information, visit www.flossfish.com.

Excellerator Series

Propel introduces the new Excelleration Series, which consists of the Excellerator device and the Excellerator RT. The Excellerator and RT are both used to create micro-osteoperforations which stimulate the alveolar bone to accelerate tooth movement and release challenging movements. Similar to the Excellerator, the RT provides the practitioner with the same advanced orthodontic treatment, however it includes an autoclavable handle and disposable tips to minimize waste and maximize storage efficiency. For more information, visit www.propelorthodontics.com.

Ring-light

The new Ring-light from CliniPix has a metal shoe plate eliminating breakage common to many flashes, a positive “flip-lock” prevents loss of contact between camera and flash. Built-in focus lights are helpful when taking occlusal or posterior views. The lights remain “on” to aid in focusing and automatically turn “off” when taking the actual photo E-TTL compatible with Canon and ITTL for Nikon cameras, adapters supplied to fit most macro lenses. For more information, visit www.clinipix.com.

Assure Plus All Surface Bonding Resin

Reliance Orthodontics is proud to introduce Assure Plus All Surface Bonding Resin. It is now possible to bond to every intra-oral surface with just one primer. Assure Plus allows you to bond directly to normal, atypical, wet or dry enamel, dentin and defective enamel, gold, amalgam, stainless steel, plastic and composite restorations, porcelains and even zirconia. Assure Plus is compatible with all light and chemical cure pastes. For more information, visit www.relianceorthodontics.com.

Futurabond U

VOCO Futurabond U is a universal adhesive in a unit dose delivery system. Futurabond U's two main advantages are first its universal indications for all adhesive procedures without the need of any additional activators or primers and second Futurabond U's ability to prevent solvent evaporation a well-documented challenge for adhesives dispensed in a bottle. Futurabond U's versatility allows it to be used in self-, selective- or -total etch mode without any additional primers or activators on virtually all substrates. For more information, visit www.vocoamerica.com.

H4

Ortho Classic's H4 passive self-ligating bracket is a low-profile, one-piece, metal-injection-molded part. With +/- tolerance of .0008; the H4 bracket provides reliable and predictable results. Precise wire slot depth provides improved accuracy with rotational and torque control. Torque is built into the base of each bracket and anatomically contoured for accurate tooth placement. The one-piece Treadlok pad has an open-flowing channel design allowing air bubbles to escape, promoting maximum bond strength and multi-directional sheering protection. For more information, visit www.orthoclassic.com.

Cloud9Ortho

Cloud9Ortho is now upgrading customers to version 4.0 which includes many new enhancements including a patient portal. Patients will be able to login and view their account info through the practice website. The new Care Call feature will let you view and complete Care Calls from any smart phone at any time with just one click through the free mobile app. The enhanced To-Do system will let you assign tasks to employees and follow up to make sure they are completed. These new features provided at no charge, all Cloud9Ortho customers will receive this update free of charge. For more information, visit www.cloud9ortho.com.

Orthodontext

Orthodontext is a simple automated tool to text patients custom treatment reminders such as; to wear elastics, change aligners, brush their teeth etc. Once the patients cell number is entered into Orthodontext, the patient manages their reminders themselves, either by replying to a text or by going to the practice website. The practice spends less than one minute per patient to manage this powerful tool that improves compliance, enhances marketing efforts and helps the bottom line. There is no setup fee, no contract and a

30-day no-obligation free trial. For more information visit www.orthodontext.com

PowerScope Class II Corrector

PowerScope is an innovative, ready-to-use, chairside solution for Class II correction. This one-piece, one-size-fits-all appliance goes from package to treatment in just seconds, requiring no lab setup or special band assemblies. PowerScope attaches wire to wire for quick and easy chairside installation, and features an internal NiTi spring mechanism delivering 260 grams of force for continuous activation during treatment. PowerScope features a fatigue-tested, durable telescoping design and unique ball and socket joints to maximize lateral movement. For more information, visit www.americanortho.com.

Damon Clear2

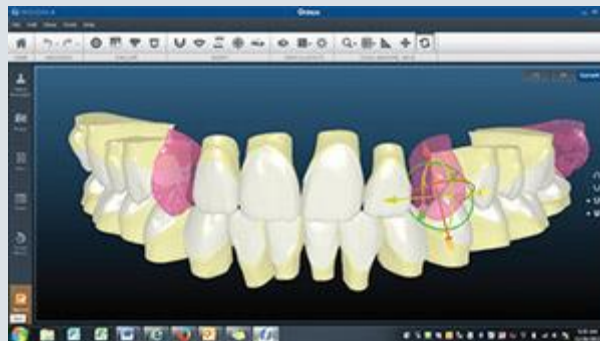

Featuring an ultra-precision slot, Damon Clear2—the only 100 percent clear self-ligating bracket—offers two

times the rotational control for meticulous finishing and efficient treatment. An aesthetic solution for the image conscious, Damon Clear2 provides the performance and control needed to treat a wide variety of cases with outstanding results. For more information, visit www.ormco.com.

Insignia Ai

Insignia Ai is Ormco's enhanced Insignia Advanced Smile Design Approver Interface that features an updated sleek design for a more intuitive experience. It now includes a Wizard that navigates users through the suggested approval process step-by-step to provide an added level of case support. For more information, visit www.ormco.com.

Lythos Digital Impression System

Lythos Digital Impression System offers a convenient, powder-free scanning method using innovative video technology to capture realtime impression data for all intended appliances and records. With heightened

accuracy, Lythos ensures more precise appliance fittings with fewer necessary chairside adjustments. Additionally, the ergonomic wand and lightweight unit enables easy transport. For more information, visit www.ormco.com.

Indirect Bonding Transfer Tray

Motion View Software, LLC introduces its new Indirect Bonding Transfer Tray module for creating orthodontic bracket transfer trays on its new inoffice 3D printer. Virtually diagnose and plan treatment for your patient in 3D using the Ortho Insight 3D software, then test the bracket placement with virtual archwires and print indirect bracket transfer trays on your own 3D printer. It also allows inoffice design and printing of surgical splints and other acrylic type appliances. For more information, visit www.motionview3D.com.

Dolphin Imaging & Management Solutions

Dolphin Cloud offers a complete solution, giving you access to all functions and features of your Dolphin Imaging and Management software products. This includes full-on practice management software features including online questionnaire, imaging and cephalometric tracing software including 3D; and Aquarium case presentation movies. Data is securely backed up in SAS-70 Type II certified hosting facilities.

Additional benefits include: automatic updates, supports multiple locations and offices, and works on mobile devices like iPads and Android tablets. For more information, visit www.dolphinimaging.com/cloud.

My Orthodontist Mobile App

The new My Orthodontist mobile app lets patients keep in touch with your practice directly from their smartphones. Encourage them to download My Orthodontist to their iOS or Android device for access to personal information such as appointments, account balance, online questionnaires and more. Other items at their fingertips include media files such as practice videos and images, news and RSS feeds from your web site, social media, and info about the doctor and staff. For more information,

visit www.dolphinimaging.com/myortho.
