

## Is Invisible Aligner Treatment for me?

### Easier than ever!

Many adults and teenagers are eager to achieve beautiful smiles without wearing braces.

**Simpli5** is an express aligner system that corrects the minor imperfections you dislike in only 5-6 months. **Simpli5** is ideal for the front 4-6 teeth that are visible when you smile, even if you have previously completed orthodontic treatment.

Simply schedule a consultation with us. Once we determine that you are a candidate, we will take impressions that will be used to develop a set of aligners precisely for your smile. **You'll be able to begin aligner treatment just 3-4 weeks later.**
